SUMMARY

ComputerScience graduate with hands-on experience building full-stack and backend applications using Java, Spring Boot, React.js, REST APIs, MySQL, and MongoDB. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, DBMS, API development, and software engineering fundamentals. Experienced in developing frontend-backend integrations, implementing business logic, working with databases, debugging application issues,and using Git-based development workflows. Strong problem-solving skills with a focus on building reliable and maintainable software.

EDUCATION

Technocrats institude Of Technology, Bhopal **2026**
Bachelor of Technology(B.Tech)inComputer Science and Engineering (Artificial Intelligence) **CGPA: 8.0/10**

PROJECTS

School Management System **Live Demo**
React.js, Java, SpringBoot,SpringSecurity, REST APIs, MySQL, JWT

- Developed a full-stack School Management System using React.js and Spring Boot to manage admissions, students, teachers, attendance, examinations, results, and fee payments.
- Implemented JWT-based authentication and role-based access control for Admin, Teacher, and Parent users using Spring Security.
- Designed a layered Controller-Service-Repository architecture with Spring Data JPA and MySQL for maintainable backend services and structured data management.
- Built REST APIs and integrated them with the React.js frontend using Axios, implementing validation, exception handling, attendance tracking, result management, and fee status calculation.

Opportunex – Job Portal Application **Live Demo**
MongoDB,Express.js, React.js, Node.js

- Developed a full-stack job portal using the MERN stack to connect students seeking job opportunities with recruiters.
- Built a responsive React.js interface with reusable components, form handling, and API integration to improve job discovery and user experience.
- Developed REST APIs and backend services using Node.js and Express.js with MongoDB for user, job, and application data management.
- Used GitandGitHubfor version control and implemented database operations and frontend-backend integration.

TECHNICAL SKILLS

ProgrammingLanguages: Java, JavaScript, SQL, Python, C, C++
Backend: Spring Boot, Spring Data JPA, REST APIs, JDBC, Node.js, Express.js
Frontend: React.js, HTML5, CSS3
Databases: MySQL, MongoDB
Core Concepts: Object-Oriented Programming, Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering
Tools: Git, GitHub, Maven, npm, MySQL Workbench, VS Code
DevOps: Linux, Docker,Jenkins, CI/CD, AWS

RELEVANT COURSEWORK

DataStructuresandAlgorithms,Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

ADDITIONAL

- Strong interestin backend engineering, REST API development, full-stack development, and scalable software systems.
- Comfortable learning new technologies, debugging applications, understanding existing codebases, and solving technical problems independently.
- Open to entry-level Software Engineering, Java Developer, Backend Developer, and Full-Stack Developer opportunities in Bengaluru.
